DEPARTMENTAL GOALS

1. To provide the mathematical skills and knowledge needed for a productive life in a rapidly changing world.
2. To strengthen and enrich the general education program.
3. To train quality mathematics teachers for the public schools.
4. To provide a solid foundation for students who will continue mathematics studies at the graduate level.
5. To prepare mathematics students for a wide variety of vocations in business, industry, and government service.
6. To provide a supportive second field of knowledge for students in other areas of study.

Mathematical skills, knowledge, and abilities learned in mathematics courses are applied in a variety of vocations to achieve goals and resolve challenging problems. A broad foundation in basic mathematics courses, emphasizing concepts and problem solving skills together with in-depth knowledge in chosen areas from higher mathematics, prepares students to function successfully in their career fields.

The department firmly believes that a competent user of mathematics must first be a good student of mathematics.

PROGRAMS OF STUDY

Majors: B.S. Mathematics
B.S.Ed. Mathematics Education
(Listed in Dept. of Education)

Minors: Mathematics
Statistics

Master: M.Ed. Mathematics
(See the Graduate Catalog for more information.)

The Mathematics Education degree program prepares the student to teach all currently offered junior high and senior high school mathematics courses. The Bachelor of Science in Mathematics degree allows the student to concurrently complete a minor, a double minor, or a second major. Careful selection of minors enables the mathematics degree holder to be well prepared for a wide variety of career options. The mathematics and statistics minors are excellent choices for any students, particularly those majoring in computer science, business or the sciences.

PROGRAM GOALS

B.S. Mathematics

1. To prepare students to enter a wide variety of vocations in business, industry, and government service that require advanced mathematical skills.
2. To provide instruction for students to develop basic skills and knowledge as they prepare for a productive life in a rapidly changing technological world.
3. To prepare students for study of mathematics at the graduate level.

B.S.Ed. Mathematics Education

1. Mastery of mathematics content.
2. Establish learning objectives and plan for student involvement in the learning process.
3. Organize and use several instructional methods, i.e., lecture, group, activity, and discovery.
4. Plan for and use resources: texts, multimedia, microcomputers, and resource personnel.
5. Organize instruction for individual differences.
6. Design a learning environment in the classroom.
7. Demonstrate planning for community involvement and/or personal and professional growth in education.

GENERAL INFORMATION

Incoming freshmen are placed in their first mathematics course based on their major and their mathematics background. ACT scores and a placement test help with this process. Since a student's success in each mathematics course depends on the knowledge and skills developed in other mathematics courses, the student is expected to work carefully with his/her advisor in planning his/her enrollment in mathematics. Majors must maintain at least a 2.5 GPA in their mathematics coursework.

A student with Advanced Placement Calculus (AB or BC) qualifies for several hours of mathematics credit. Such students should check with the Mathematics Department to determine credit earned and the next course in which to enroll. CLEP examinations are available in College Algebra, Precalculus, and Calculus I for students who wish to earn credit by examination in any of these courses. The Precalculus CLEP exam may be used to earn credit for College Trigonometry.

A mathematics major or minor will provide students with many job opportunities in fields besides teaching, such as actuarial sciences, energy fields, computer programming, economics, banking, law, computer analysis, and many more. Most job settings require workers to be problem solvers. A mathematics major or minor, when paired with another area of study, enhances job placement in almost any area. Mathematics graduates at SWOSU have been successful in finding jobs in a wide variety of career fields and in pursuing graduate degrees in mathematics and/or computer science and other related fields.

The Mathematics Department promotes the appropriate use of technology in the teaching and learning of mathematics. A networked PC lab with various mathematical and statistical software packages is located within the department.

Several mathematics majors and minors work in our tutor lab to provide students with any extra math help they might need. Opportunities also exist for employment as homework graders.

Southwestern Oklahoma State University has an active chapter of the Mathematics Honor Society, Kappa Mu Epsilon (KME), whose main objective is to further student interest in mathematics and to familiarize the members with advances being made in this subject. Many students in the Mathematics Department have been active in joining KME and in attending regional and national meetings organized by the society and by the Mathematical Association of America (MAA).

The department also supports an active Math Club. Regular meetings are held. Typical activities include problem sessions, faculty talks and math-themed games.

The Mathematics Department partners with the Education Department to train Mathematics Education majors to become highly qualified mathematics teachers at the junior and senior high school levels.
