PROGRAM GOALS
The goals of the distance education Health Information Management Program at Southwestern Oklahoma State University serve as the foundation for program development and continuous evaluation. Program goals are:

- To provide the academic foundation necessary to ensure that graduates are able to successfully perform the Entry Level Competencies of the HIM profession as periodically defined by nationally accepted standards of practitioner roles and functions,
- To provide a quality program in Health Information Management supported by a comprehensive curriculum based on continuous assessment, modification, and reanalysis,
- To employ and foster the development of faculty who demonstrate competence in current and emerging HIM professional practice particularly related to areas of instructional responsibility, and
- To monitor and be receptive to the needs of the community of interest served by the HIM program at SWOSU.
- To prepare students to develop the skills needed by practicing professionals in the Health Information Management field and provide assurance that graduates of the program demonstrate the entry-level competencies.

PROGRAMS OF STUDY
Major: Health Information Management
Minor: Health Care Administration

GENERAL INFORMATION
THE PROFESSION
The Health Information Manager works on the business side of healthcare and is a key member of the modern medical team who plans, designs, develops, and manages health information systems. S/he is responsible for controlling data and confidentiality, clinical statistical data, and quality improvement programs in all types of health care facilities, organizations, and agencies. The Health Information Manager combines knowledge of health care, health documentation, information management, and administration to provide services which meet the medical, administrative, legal, ethical, regulatory, and institutional requirements of the health care delivery system being served. The profession is an excellent choice for self-motivated individuals interested in a career that combines knowledge of medicine, business, and computer science. The demand for professional Health Information Managers is increasing, and the number of trained individuals needed will actually increase for several years. Career opportunities are found throughout the nation and in foreign countries. Employment is found specifically in hospital health information departments as directors, assistant directors, area supervisors, coders, and specialists in the areas of data administration, cancer registry, performance improvement, and reimbursement, as well as analysis, design, implementation, and meaningful use of electronic health record systems. Job opportunities other than hospitals include outpatient clinics, health centers, medical research organizations, consulting firms, private consulting, long-term care facilities, insurance companies, private and governmental health agencies, correctional facilities, and colleges and universities with educational programs in health information management and technology.

ADMISSION REQUIREMENTS
Any student may declare their major as Pre-Health Information Management and enroll in the pre-professional curriculum. This curriculum consists of 67-68 hours including courses which meet the general education requirements of the University. When most of these pre-professional courses are completed, students may apply for admission into the professional Health Information Management Program. Applications are available online at www.swosu.edu. To be considered for acceptance, an applicant must have completed the majority of the pre-professional curriculum and achieved and maintained a GPA of 2.50 in these courses. Students must submit an application and two references to be considered for program admission. The number of applicants accepted will reflect an appropriate student-faculty ratio and the availability of appropriate clinical resources. Students in Health Information Management will complete a minor in Health Care Administration.

Applicants to the HIM Program must possess the following general qualities: critical thinking, sound judgment, emotional stability and maturity, empathy, physical and mental stamina, and the ability to learn and function in a wide variety of didactic and clinical settings. Graduates of the HIM Program must have the minimal skills, essential functions, and knowledge to function in a broad variety of clinical settings.

Students in the HIM Program must have the following minimum abilities:

- Technical competence to complete the HIM degree since the degree is a distance education program/100% online.
- Ability to meet minimum hardware and software requirements for all coursework throughout the HIM program as specified by faculty
- Ability to acquire and apply information from classroom instruction, laboratory experience, independent learning and team projects.
- Ability to communicate effectively in English using oral and written form with colleagues, clerical employees, other health professionals, patients, attorneys, workers’ compensation representatives, insurance companies, as well as other third party payers and other individuals and agencies who need information from patient records or databases maintained in HIM departments.
- Ability to calculate mathematical information, such as hospital statistics, budgets, and productivity information.
• Ability to use computers and complete computer-based assignments and the ability to operate additional equipment located in HIM departments.
• Manual dexterity necessary to complete activities relative to the HIM office environment with sufficient mobility to maneuver in small areas.
• Visual ability sufficient to read and access medical information in a variety of media (i.e. paper records, computerized data).
• Ability to synthesize information regarding health care outcomes for formal, verbal, and/or written presentation to health care professionals as well as the ability to delegate to subordinates.

Upon admission, a student who discloses a properly certified disability will receive reasonable accommodation but must be able to perform the above listed essential functions of the curriculum and the HIM professional environment.

THE MANAGEMENT PRACTICUM
The purpose of Management Practicum is to provide the vital link between textbook, campus instruction, and on-site experience. Students are assigned to a health care facility for 120 hours to gain “real life” experience throughout the professional curriculum. Students will also complete an 80-hour virtual coding rotation. Affiliate sites are located in Oklahoma City and other Oklahoma locations. Arrangements may be made for students to complete requirements in out-of-state facilities. Students are responsible for all expenses incurred including meals, transportation and lodging. In addition, the student should be able to show evidence of current health insurance coverage, current physical examination and immunizations, drug screen, completion of a background check prior to practical experiences, and additional requirements based on healthcare facility preference.

PROGRAM COMPLETION
Students must achieve and maintain a 2.5 GPA during the professional program to be allowed to progress through the professional sequence, as well as the maintenance of a "C" or better in all professional courses. If courses are sequenced appropriately and completed in a timely manner, students will complete all requirements for program completion in May of their senior year.

PROGRAM OUTCOMES
Annual graduate and employer follow-up indicate that both graduates and employers are highly satisfied with the HIM program at SWOSU. Student performance on the national certification exam is at or above the national average. The SWOSU HIM graduate is highly marketable in the health workforce filling a diverse variety of HIM related roles including management, diagnostic coding, cancer and trauma registry, and positions relating to emerging technologies associated with electronic health information. Limiting factors to employment are mobility constraints.

ACCREDITATION
The Health Information Management Program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). Accreditation ensures that graduates will be eligible to take the National Registration Examination for the Registered Health Information Administrator (RHIA).
BACHELOR OF SCIENCE
IN HEALTH INFORMATION MANAGEMENT (HIM.BS) (Old Code No. 551)

GENERAL EDUCATION (Min. 40 hours)
Courses that are required. Courses that are recommended. 9
Communication.................................................................................................................. 9
ENGL 1113 English Composition I
ENGL 1213 English Composition II
COMM 1313 Introduction to Public Speaking OR
TECH 3143 Technical Presentations (if permitted by degree program)

Quantitative Reasoning ................................................................................................. 3
Select one course.
MATH 1143 Mathematical Concepts
MATH 1153 Mathematical Applications
MATH 1193 Elementary Statistics
MATH 1313 Functions and Modeling
MATH 1513 College Algebra
or a higher numbered math course

U. S. History .............................................................................................................. 3
Select one course.
HIST 1043 U.S. History to 1877
HIST 1053 U.S. History since 1877

American Government ................................................................................................. 3
POLSC 1103 American Government & Politics

Science ............................................................................................................................ 7-8
Select one course from Life Science and one course from Physical Science. One Science course must be a lab science.

Life Science.............................................................................................................. 3-4
BIOL 1004 Biological Concepts w/Lab
BIOL 1013 Current Issues in Biology
BIOL 1054 Principles of Biology I w/Lab

Physical Science........................................................................................................ 3-4
ASTRO 1904 Astronomy
CHEM 1004 General Chemistry w/Lab
GEOL 1934 Physical Geology w/Lab
PHY 1044 Basic Physics I w/Lab
PHY 1063 General Physics (or a higher numbered chemistry or physics course)
SCI 1501 Concepts of Physical Science Lab
SCI 1513 Conc of Phy Science (can be taken w/wo lab)

Humanities and Social Science ............................................................................... 12
Select one course from each sub-category and one additional course from any subcategory below.

Humanities .................................................................................................................. 3
GEOG 1103 World Cultural Geography
HIST 1033 World History
HUM 1103 Introduction to Humanities

Fine Arts ....................................................................................................................... 3
ART 1223 Art Survey
COMM 1263 Introduction to Theatre
LIT 2333 Introduction to Film
LIT 2413 Introduction to Literature
MUSIC 1013 Introduction to Music I
MUSIC 1103 Music and Culture (Music majors only)
MUSIC 1123 History of Rock-n-Roll
PHILD 1453 Introduction to Philosophy

Social and Human Sciences ......................................................................................... 3
ASL 2163 American Sign Language I
ECONO 2263 Intro to Macroeconomics
ECONO 2363 Intro to Microeconomics
ENTRP 1123 Intro to Business
FINAN 2113 Personal Financial Planning
ITAL 1004 Elementary Italian I
KINES 1133 Wellness Conc & Exercise Applications
LATIN 1054 Elementary Latin I (or higher number)
PSYCH 1003 General Psychology

SOCIO 1003 Introduction to Sociology
SPAN 1054 Elementary Spanish I (or higher number)
TECH 1223 Technology and Society

Computer Proficiency ................................................................................................. 0-3
COMSC 1023 Computers and Info Access, or a department-assigned course which satisfies the Computer Proficiency in the major, or the SWOSU Proficiency Exam, or HS course clearly defined to meet our goals.

GE Elective .................................................................................................................. 0-3
Students who meet the computer proficiency by exam or HS course must choose an additional GE course from any category.

HEALTH INFORMATION MANAGEMENT MAJOR
Professional Courses................................................................................................. 42
HIM 3033 Introduction to Health Information
HIM 3122 Intro to Electronic Health Records
HIM 3123 Advanced Electronic Health Records
